Memo to File:

RE: 5M Corporation  
Silver Reef Mine  
ACT/053/~~004~~ 002  
Washington County, Utah

On February 22, 1984, Mr. Jerry Glazier of 5M Corporation called to discuss the possibility of delaying submission of their revised MR-1 form. He stated that 5M is in the process of joint-venturing with a larger company and requested a delay in MR-1 form submission until they have solidified their plans. 5M will submit a revised map of their Silver Reef operation delineating current disturbance and will submit a revised bond estimate within the time frame (30 days) discussed during the February 7, 1984 meeting.

I discussed this issue of delaying submission of their revised MR-1 form with Jim Smith on February 22. It was decided that (1) 5M could delay this submission providing the Company submit, in writing, a date in the near future when they will submit the revised form, and (2) 5M must submit their revised bond estimate within the 30 day (from February 7, 1984) time frame.

This information was given to Jerry Glazer by phone on February 24, 1984.
